Greenway ACT 2900

18 October 2026
The Chairperson and Members
Executive Committee
The Owners — Units Plan 12457, Greenway Terraces
c/- Grady Strata and Facilities (attention: Ms Lulu Issa)
Dear Chairperson and Committee Members
The pool-area palm trees and their replacements: why have my questions of 9 April 2026 not been answered?
On 9 April 2026 I wrote to Ms Lulu Issa asking questions about the removal of the palm trees near the pool and the trees planted to replace them. I followed up on 26 May 2026 and asked for a response by close of business on Friday 5 June 2026. I have received no answer to either letter.
As at the date of this letter, 192 days have passed since I first raised these questions (135 days since the 5 June date I set). I had also asked on 26 March 2026, now 206 days ago, what resolution or other authority was relied on for the palm replacement. That is unanswered too.
These are simple questions of fact. I ask again, and ask that each be answered in writing:
Questions
1. Why were the palms removed? What exactly was the reason the palm trees at the pool were removed, and who decided it should be done?
2. Cost of removal. What did it cost to remove the palm trees?
3. Cost of the replacement trees. What did it cost to supply and plant the new trees? Please state the species, the number of trees, the contractor or landscaper, and the quote or invoice amounts.
4. Are the new trees dead? Please confirm whether the replacement trees are dead, and how many of them.
5. What is now planned? What is the plan for dealing with the dead trees, who will carry out the work, and who will bear the cost?
6. Total cost. What is the total cost to the Owners Corporation of the whole project to date, being removal, replacement and any further work, and what is the expected total once the dead trees are dealt with?

7. Who ran the project? Who actually ran this project with the contractors? Please name the committee member who was making the decisions about the planting, and say who approved the quote and the choice of species, and when.
Also outstanding from my letter of 9 April 2026
8. Species advice. Was the species of replacement tree recommended by the contractor or landscaper?
9. Contractor liability. If so, will replacement be at the contractor's cost or the Owners Corporation's?
10. Cause. Is the cause of the decline or death of the trees known, and has any investigation been done into whether pool water, splash or run-off contributed?
11. Authority. What resolution or other authority was relied on for the palm replacement (my question of 26 March 2026)?
Why has this not been answered?
I also ask the Committee to state, in writing, why these questions have not been answered in 192 days, who was responsible for answering them, and what has been done to make sure they are answered now. If the answer to any question above is that no record exists, please say so.
I ask for a written reply by close of business on Friday 30 October 2026.
Yours sincerely
Stephen W Prothero
Owner, Unit 151
